

# MADONIAS

8

## VERY EARLY FORAGE MAIZE WITH VERY HIGH STARCH CONTENT

- **EXCELLENT FEED VALUE**  
Very high level of starch and energy
- **MIXT OF YIELD AND PRECOCITY**  
early flowering a stable result
- **GOOD EARLY VIGOR**  
in early and late drilling

### Identity

<b>Maturity</b>	very early
<b>Use</b>	Silage

### Characteristics

<b>Plant height</b>	Medium
<b>Type of grain</b>	Flint
<b>No. of rows</b>	16-18
<b>No. of grains per row</b>	26-28
<b>TKW</b>	300-320
<b>Flowering (C°)</b>	770
<b>Silage maturity 32% DM</b>	1250

### Agronomy

<b>Early vigor</b>	8
<b>Stay green</b>	8
<b>Dry down</b>	6
<b>Lodging</b>	9
<b>Drought tolerance</b>	7

### Disease tolerance

<b>Helminthosporium</b>	8
<b>Fusarium (plant)</b>	7
<b>Fusarium (ear)</b>	7

### Feed values

<b>Starch</b>	8
<b>dNDF</b>	8

### Growing recommendations

	Optimal conditions	Limited conditions
Adaptation	4	4
Density - silage use (Pl/ha)	105	95

MADONIAS is a silage variety with very early maturity. It brings high level of energy thanks a very good level of starch a good digestibility of plant. Madonias is a very secure hybrid thanks his very good stay green.
