

# MAS 08.F

7

## HYBRIDE WITH HIGH LEVEL OF YIELD AND DIGESTIBILITY

- **SILAGE POTENTIAL IN EVERY LOCATION**  
in every location
- **EXCELLENT GLOBAL DIGESTIBILITY**  
With high level of starch
- **EXCELLENT AGRONOMY AND STAY GREEN HYBRID**  
Good tolerance against eyespot

### Identity

<b>Maturity</b>	early
<b>Use</b>	Silage

### Characteristics

<b>Plant height</b>	Medium - Short
<b>Type of grain</b>	Flint
<b>No. of rows</b>	14-16
<b>No. of grains per row</b>	28-32
<b>TKW</b>	280-300
<b>Flowering (C°)</b>	770
<b>Silage maturity 32% DM</b>	1280

### Agromony

<b>Early vigor</b>	8
<b>Staygreen</b>	8
<b>Dry down</b>	7
<b>Lodging</b>	8
<b>Drought tolerance</b>	7

### Disease tolerance

<b>Helminthosporium</b>	7
<b>Fusarium (plant)</b>	8
<b>Fusarium (ear)</b>	8

### Feed values

<b>Starch</b>	9
<b>dNDF</b>	8

### Growing recommendations

	Optimal conditions	Limited conditions
Adaptation	4	4
Density - silage use (Pl/ha)	105	100

Mas 08.F can be used in all types of soil. This genetic has a strong capacity to do regular cob with 16 rows to reach high starch content and high digestibility. Mas 08.F is also tolerant against diseases and has a good stay green
