## NEW STARCHY NEWCOMER FOR THE NORTHERN SILAGE MARKET

- HIGH STARCH CONTENT
- VERY EARLY MATURITY
- STAINING POWER

### Identity

<b>Maturity</b>	very early
<b>Use</b>	Silage

### Characteristics

<b>Plant height</b>	Medium - Short
<b>Type of grain</b>	Flint
<b>No. of rows</b>	12-14
<b>No. of grains per row</b>	28-32
<b>TKW</b>	260
<b>Flowering (C°)</b>	760
<b>Silage maturity 32% DM</b>	1230

### Agronomy

<b>Early vigor</b>	8
<b>Stay green</b>	6
<b>Dry down</b>	6
<b>Lodging</b>	8
<b>Drought tolerance</b>	7

### Disease tolerance

<b>Helminthosporium</b>	7
<b>Fusarium (plant)</b>	7
<b>Fusarium (ear)</b>	7

### Feed values

<b>Starch</b>	7
<b>dNDF</b>	7
<b>UFL</b>	7

### Growing recommendations

	Optimal conditions	Limited conditions
Adaptation	4	3
Density - silage use (Pl/ha)	105	100
