

# SIMONA

NEW

## THE TOP HYBRID IN ALL SITUATIONS

- **VERY HIGH YIELD POTENTIAL**  
Above market references
- **ADAPTABILITY**  
To be performing in all conditions
- **EXCELLENT AGRONOMIC PROFIL**  
Early vigor, early flowering, Short plant

### Product id

<b>Flowering</b>	Mid early
<b>Maturity group</b>	mid early
<b>Oil type</b>	Classic

### Characteristics

<b>Plant height</b>	Medium - Short
<b>TKW</b>	Medium
<b>Oil content</b>	42 - 44 %
<b>Glucosinolate content</b>	13 - 15µmoles/g
<b>Protein content</b>	34 - 37 %

### Agronomy

<b>Early vigor</b>	7
<b>Regrowth after winter</b>	8
<b>Lodging</b>	6

### Disease tolerance

<b>Broomrape</b>	-
<b>Phoma</b>	2
<b>Sclerotinia (stem)</b>	8
<b>Verticillium</b>	8

### Growing recommendations

	Optimal conditions	Limited conditions
Adaptation	4	4
Density (Plant/ha)	35 - 40	25 - 35

SIMONA is a new hybrid with characteristics to satisfy all farmers. This hybrid can perform in high potential than in low and stressful fields. In situations with high loss of plants at the sowing, don't hesitate to increase the density until 40 plants/m<sup>2</sup>. DC2036 is a future leader in the mid-early group!
